Skilled Swing Bed Program

During certain hospitalizations some patients require further care to reach an optimal level of strength and wellness in order to safely return to their home or residential facility. Swing Bed programs allow the option to extend a stay related to surgery, illness, or injury. FCPHD's skilled swing bed program provides our patients with access to a comprehensive rehabilitation program while being closer to their local homes, families, and communities. Examples of patients that may benefit include the following:

- Stroke
- Surgeries; Hip, shoulder, knee, spine, or amputations
- Wound care management
- Deconditioning from prolonged hospital stay

Swing Bed admissions contribute to improved quality of function.

Services and Benefits Include:

- Providers available 24/7
- Hospital Services
 - Imaging, Lab, and Pharmacy
- Low patient to nurse ratio
- Wound care management
- Individualized patient centered care
- Physical and Occupational Therapy
